## ESA's Technical Directorate Asset Management - Present and Future

*Friday, 28 September 2018 11:00 (30 minutes)*

The Directorate of Technology, Engineering and Quality (TEC) from the European Space Agency has recently started a process to overhaul the way its different laboratories manage their assets.

The talk will cover a brief overview of the current practices as well as the presentation of the next planned steps towards a more efficient and homogeneous system. The key areas for improvement will be presented as well as the perceived challenges.
